TEMPEST ANNOUNCES THE ORIGINAL AVIATION SPIN-ON OIL FILTER

GIBSONVILLE, NC — Aero Accessories, the manufacturers of the Tempest® brand of dry air pumps, pneumatic components, and fuel pumps announced today their new line of aviation spin-on oil filters. The same Tempest innovation and quality that has recently revolutionized the dry air pump market is now available in oil filters. Branded the Tempest Original Aviation Spin-on Oil Filter, it reintroduces an improved version of an oil filter design, proven with over 30 years experience.

The Original oil filter has many design features that benefit the customer to assure improved filtration performance. The full size filter design incorporates the following features as compared to competitive filters:

- Thickest can and base plate with full weld integrity
- Highest burst pressure rating – 700 psi
- More filtration media – 311 sq. inches
- Only filter to meet TCM bypass relief valve specs of 12-14 psi

New Technology

- Magnetic secondary filtration system that attracts steel particles too small to be filtered in the media
- Convenient six or twelve pack packaging

The Tempest Original oil filter is the only aviation filter manufactured in a dedicated aviation filtration facility. John Herman, Vice President of Sales and Marketing for Tempest states; "We believe quality is best maintained in-house and not something that should be outsourced. Therefore, we have built a facility dedicated to aviation filtration products, where we can assure the quality of the Original oil filter meets our standards."

All spin-on filter part numbers are FAA/PMA approved and are now available through Tempests' network of world-wide distributors. For more information regarding the new "Original" aviation oil filter and other Tempest products or its distributors, please go to www.tempestplus.com or call 1-800-822-3200.

Tempest is the leading manufacturer of pneumatic systems, including the Tornado 3000 dry air pumps, filters, valves, regulators and electric stand-by pumps. Additionally they manufacture Tempest fuel pumps and magneto parts, and a complete line of aviation spin-on oil filters. Its manufacturing facility is based in Gibsonville, NC with sales and marketing offices located in Greenville, SC and Atlanta, GA.
